“The true test of friendship”

The aim of the “Me&3” campaign is to encourage friends to take care of each others’ sexual health and well-being, by taking up voluntary counselling and testing (VCT) at the PRISM HIV and STI Clinic.

The “Me&3” campaign places the responsibility into your hands to initiate regular HIV testing for yourself and your friends, as well as to encourage ongoing safer sex conversations within your friendship circles.

By being “me” or one of the “3”, you will gain points. The more points you earn, the bigger the reward.
